Executive Summary

Final – Year CSE student skilled in Python, Java, and SQL, with hands-on experience spanning full-stack development and data science pipelines. Adept at building robust REST APIs and implementing AI-driven features. A strong problem-solver eager to contribute versatile technical skills to a fast-growing engineering team.

Education

SRM Institute of Science and Technology	2027
B.Tech in Computer Science and Engineering with Cloud Computing	CGPA – 8.66/10
Smt. Ramkuwar Devi Fomra Vivekananda Vidyalaya	2023
Class XII · CBSE · Chromepet, Chennai	Percentage – 79.6%

Experience

AmbalSoft InfoTech Private Limited	Jun 2025 – Jul 2025
SDE · Internship	Mylapore, Chennai
- Engineered scalable healthcare backend APIs using ASP.NET Core, designing robust RESTful endpoints to efficiently manage patient records, doctor schedules, and medical reports. - Implemented secure business logic for appointment scheduling systems to protect sensitive healthcare workflows and maintain strict data integrity. - Optimized data pipelines for laboratory results, significantly enhancing data flow efficiency and ensuring high system reliability across endpoints.	

Projects

Blockchain-Encrypted Storage with AI Anomaly Detection	Mar 2026 – May 2026
- Architected a secure full-stack file-sharing platform using a FastAPI backend and React frontend, integrating AES-128 encryption with decentralized, blockchain-based hashing to guarantee tamper-proof file integrity. - Designed and deployed a real-time AI anomaly detection system, building custom ML-driven data pipelines to continuously analyze user access patterns, proactively identify security threats, and safeguard sensitive system cloud endpoints.	
AI-Based Crop Recommendation for Farmers	Aug 2025 – Oct 2025
- Engineered AgriSense, a full-stack agricultural platform utilizing FastAPI and JWT role-based access control, integrating Google Gemini API for AI-powered crop recommendations and disease detection. - Architected a multi-featured ecosystem featuring 22 – language support, real-time market pricing, an integrated e-commerce marketplace, and automated weather forecasting to deliver scalable, localized insights.	
Smart Campus Grievance Resolution System	Mar 2026 – Apr 2026
- Built a full-stack campus complaint system using FastAPI and React with role-based access controls. - Designed an automated tracking pipeline that streamlines issue submission, live status updates, and resolution workflows.	

Skills

Programming Languages: Python, Java, C++, JavaScript, C#, C, SQL
Tools and Technologies: HTML, CSS, Git, MongoDB, MySQL, MS SQL Server
Languages and Frameworks: NumPy, FastAPI, ASP.NET Core, Flask, Pandas, React
Technical Skills: Data Structures and Algorithms, Object-Oriented Programming, Competitive Programming

Achievements

2nd Runner-Up in DataSprint 3.0 Hackathon Certificate	Feb 2026
Top 50 teams in the internal round of Smart India Hackathon (SIH) 2025.	Sep 2025
Solved 130+ coding problems on LeetCode LeetCode
